

Keya Fusion Technology Private Limited

CASHEW GRADING MACHINE

The cashew grading machine uses a combination of laser and camera technology to detect defects and sort the cashews by size and color. The sorting process is fast and accurate, ensuring that only the best quality cashews are passed through.

The benefits of using a cashew grading machine include increased efficiency, decreased labor costs, and improved product quality. These machines are also versatile and can be used for grading other products, such as almonds and pistachios.

Specification

- 80 To 100 Kg Throughput Per Hour
- 5 Grades In A Single Pass 92% Count Accuracy
- Breakage Controllable Grades 180/210, 240, 320, 400 & 450/500 As Per Customer Requirement
- Set Plug-N-Play System Simple System For Cashew Processors
- 24 Hrs. Duty Cycle
- 7.5 Hp Total Power, 3 Phase

Vacuum Packaging Machine

Vacuum Packaging Machine - A device that removes air from a package before sealing it. It creates an airtight environment, extending the shelf life of food by preventing oxidation and inhibiting the growth of spoilage organisms. Used widely in the food industry, it preserves freshness, prevents freezer burn, and maintains the quality of perishable items like meat, fish, and vegetables for longer periods.

Double-Chamber Vacuum Packaging Machine

Workroom size	570*540*110mm	670*540*110mm
Sealing length	500*10mm	600*10mm
Weight	250kg	320kg
External size	1350*850*980mm	1550*850*1020mm
Gas Flushing Add on available	Available	Available

Deep-Chamber Vacuum Packaging Machine

Workroom size	550*510*90 mm
Sealing length	500*10mm
Weight	250kg
Gas Flushing Add on available	Available
External size	700*600*900 mm

Horizontal Vacuum Packaging Machine

Workroom size	520*540*80mm
Sealing length	500*10mm
Weight	120kg
External size	760*700*1050mm
Gas Flushing Add on available	Available

Vertical Vacuum Packaging Machine (upto 25Kgs)

Workroom size	310*730*815
Sealing length	660 mm
Weight	180Kg
Gas Flushing Add on available	Available
External size	1130*755*1415
