

Cashew Boiler

The Cashew Boiler is used to steam and soften cashew nut shells for easier removal in subsequent stages. It ensures uniform heating and controlled pressure to prepare raw cashew nuts efficiently for further processing, optimizing workflow and maintaining nut quality.

Product Name	Cashew Boiler
Capacity	120 Kg / Batch 320 Kg / Batch 500 Kg / Batch 1000 Kg / Batch
Body Material	Stainless steel / M.S.
Fule Type	Wood
